Ionic Mineral Supplements Exclusively For Health Care Professionals

NEW ALL NATURAL SENSITIVE EYE DROPS LIKE NO OTHER

Bio Nativus prides itself in working with our doctors and healthcare practitioners and value their input, suggestions and requests; as a result we have developed a new sensitive eye drop formula. This new formula contains the same basic elements and ingredients as our original formula, but is softened in order to accommodate the more sensitive eye.

Trace Minerals and Magnesium are critical to eye health.

Minerals are a part of every cell and body fluid. They are the neurotransmitters that signal every action within the body.

Since the eye is a muscle, Magnesium is vital for its' proper function and movement. The combination of 72 trace minerals and Magnesium relax, soothe and relieve dry, irritated, stressed eyes.

MSM (Methylsulfonylmethane), which is a naturally occurring sulfur in the body, is added to soften the eye membrane. This allows nutrients to pass through the eye membrane more easily and in turn helps the eye release waste particle buildup and decrease inflammation. Water soluble nano particle Smart Silver 10 ppm (parts per million) is also added as an all natural bactericidal agent.

Suggested Use: 1-2 drops 3-4 times per day to relieve irritation.

Ingredients: Trace Mineral Drop Complex™ (a trade name for the concentrated sea minerals from the Great Salt Lake), MSM and Smart Silver in a base of steam distilled water.
