

Delpro™ Capsules

Packaged in bottles of
60 vegetarian capsules

*The potential benefits of Delpro™ Capsules, a dietary supplement

- Del-Immune V™ to provide immediate immune system support.
- High potency cultures of lactobacillus to help contribute to improved intestinal function.
- The prebiotic Inulin, a type of fructooligosaccharide (FOS) that selectively stimulates the growth of bifidobacteria, including *Bifidobacterium bifidum* and *Bifidobacterium longum*, and other bifidobacteria already present in the gut.

Description

Del-Immune V™

Lactobacillus rhamnosus lysate powder

Del-Immune V™ is cultured from a specific strain of Lactobacillus discovered in 1980 by a Russian research team. After proving the profound immune enhancing properties the Russian research team processed the lactobacillus to produce cell wall fragments. This process is known as lysing and was originally conceived in Bulgaria. Lysing frees activating proteins, that are imbedded inside of the lactobacillus cell walls, to stimulate and enhance the immune system response. This response focuses on our first line of defense known as the innate immune system. This is the fast acting protective response to foreign invaders including bacteria, viruses, pollen, pollutants, etc.

In 1992 the product was clinically evaluated in a variety of cancer treatments at the State Cancer Hospital, Saint Petersburg, Russia. Hospital physicians observed patients were able to complete their course of chemotherapy or radiation therapy without the usual debilitating effects. It continues to be used in Cancer Hospitals in both Russia and the Ukraine.

The product has undergone many improvements including recent manufacture in the USA. The potency of the US made product is 2 ½ times stronger than the Russian made product originally imported into the USA.

Del-Immune V™ has been used successfully in the USA for 5 years for immediate immune system support to help fight infections, cough, and fatigue.

Del-Immune V™ is a lactose free product.

*Probiotic Culture Blend

High potency pure freeze-dried cultures are blended to specifications with Inulin, a fructooligosaccharide (FOS), to the concentration listed below.

The strategy behind the blend is to combine genetically distinct probiotic organisms at significant concentrations that may help contribute to improved intestinal function.

This improved function may be the result of increased lactase activity, increased competition with harmful bacteria for docking sites in the intestinal system, stimulation of specific immune system components, inhibition of harmful bacteria by the production of inhibitors, such as organic acids or Hydrogen Peroxide (H₂O₂), and the establishment of normal or helpful bacteria during times of antibiotic therapy or other times of bacterial flora imbalance.

The product was designed so that 5+ billion probiotic organisms can be consumed per dose. The prebiotic Inulin, a type of fructooligosaccharide (FOS), makes up 40% of the blend. This ingredient selectively stimulates the growth of bifidobacteria, including *Bifidobacterium bifidum* and *Bifidobacterium longum*, and other bifidobacteria already present in the gut. The metabolism of Inulin by the bifidobacteria will reduce the pH of the gut and allow for increased Calcium adsorption.

Probiotic Culture Blend	Potency/ Capsule
<i>Lactobacillus acidophilus</i>	2.0 billion
<i>Lactobacillus casei</i>	2.0 billion
<i>Bifidobacterium bifidum</i>	2.0 billion
<i>Bifidobacterium longum</i>	2.0 billion
<i>Lactobacillus delbrueckii</i>	2.0 billion

TOTAL POTENCY 10.0 billion/ capsule

Note: Cultures are standardized with Inulin at approximately 80% by weight.

Each capsule contains:	<i>Lactobacillus rhamnosus</i> lysate powder	8.0 mg
	<i>Lactobacillus acidophilus</i>	2.0 billion
	<i>Lactobacillus casei</i>	2.0 billion
	<i>Bifidobacterium bifidum</i>	2.0 billion
	<i>Bifidobacterium longum</i>	2.0 billion
	<i>Lactobacillus delbrueckii</i>	2.0 billion

Other ingredients: Inulin powder and vegetable capsule

Suggested Use : Dietary supplement, 1 or more capsules, 3 times a day, 1 hour before or after meals.

Note: Refrigerate to maintain quality and freshness.

Delpro™ Questions and Answers

Q. If I want to try Delpro™ capsules how should I adjust my daily use of Del-Immune V™ ?

A. Reduce the dosage of Del-Immune V™ by one capsule a day when taking 3 capsules a day of Delpro™.

Q. I think Del-Immune V™ was too strong for my GI tract, how do you suggest I take Delpro™ ?

A. Be conservative! Start with only one or even a part of the contents of a Delpro™ capsule for about a week. Then progress to a slightly larger dose , i.e. a full capsule once a day for a week. Work up to 3 capsules a day over a period of a few weeks.

Also, try taking the Delpro™ after a meal or after having a snack to reduce potential GI discomfort.

Q. If I have lactose intolerance can I take Delpro™ ?

A. There should not be a problem because Del-Immune V™ and the probiotic culture blend is produced in a lactose free environment.

Q. Are there any precautions, contraindications, or side effects when taking Delpro™ ?

A. No. However we still suggest discontinuing any product that appears to be causing discomfort or a problem.

Q. Should I continue to take the probiotics that my healthcare specialist has recommended ?

A. The best thing to do is to discuss this issue with your healthcare specialist. He or she may decide that it will be unnecessary to take both the probiotics and Delpro™.

Comments Received from Physicians:

Dr. Richard S., Zurich Switzerland
regarding Del-Immune V® and Delpro™

I want to report to you the course of my flu. It broke out last Thursday afternoon. I was suddenly extremely tired, could hardly move to the bathroom and consequently went to bed. I was drinking tea and took 4 Delpro™ and 4 Del-Immune V for three days. After the third day, I felt considerably better and on the fourth day woke up completely recovered.

I was in full strength and I went straight to the office. Ever since taking Del Immune, I am again beaming with vitality.

Dr. Ted H, Gardena California
regarding Del-Immune V®

I have been recommending Del-Immune and it's been a God-send for many of my patients. When I first began using Del-Immune, I couldn't believe its effectiveness. In fact, I first used it on my wife who had come down with the flu, and wouldn't you know that she was over her illness in 6-7 hours! That was phenomenal! I can't wait to recommend your Delpro™ and see the reaction I get from the patients! Dr. Sichel, you have made practicing alternative medicine a pleasure! Please keep up the good work.

Darryl W., Huntington Beach, CA
regarding Delpro™

This letter is to thank you for the Delpro™ product. I had already noticed some improvement in my serious condition with Celiac by taking the Del-Immune V product; however, the addition of Delpro™ seemed to make a major improvement in my condition and lifestyle. Since addition Delpro™, I have noticed a remarkable increase in energy. I also am sleeping so much better due to the fact that some of my skin problems caused by the Celiac disease

have definitely ceased. My skin is not completely clear, but hopefully with the continuation of the Delpro™ product, I will continue to improve.

**Further comments from Darryl's doctor,
Dr. Betty B. Altadena, CA**

Mr. W. has Dermatitis Herpetiformis. The Delpro™ accelerated the rate of skin healing measurable; also it alleviated the severe itching. Mr. W. is over 50 years old with the problem since infancy. It was not diagnosed until one-and-a-half years ago as a form of Celiac Disease.

From Dr. Rob S, Boulder, CO regarding Delpro™

We would appreciate more Delpro™ capsules for my wife. She reports that since taking the Delpro™, her GI problems have really improved and I can see the difference in how she feels.

From Charlotte S., Phoenix , AZ
regarding Del-Immune V®

I cannot thank you enough for the product you sell! I have been using Del-Immune since the Health Science Institute featured it in their newsletter many months ago. My past experience with it has been good, but recently, I was working very hard and long on a special project. Consequently, I came down with that awful flu-like illness which usually puts me in bed for a week.

I immediately began taking two Del-Immune several times a day, drinking lots of water and trying to kick back. The first day I didn't feel very good, but had no fever. Today I am feeling fit as normal and can't believe how well this product works! It shows me again how very powerful our bodies are when they're given the natural assistance to get rid of dis-ease. It sure worked well for this 75 year old woman. Thank you again!
