**Taking Vegan Protein to a New Level**

The formulation of nanopro vegan™ is unlike any other vegan protein. nanopro vegan™ is made from non-GMO American yellow pea, brown rice and chia seed, giving you the amino acid profile comparable to whey. nanopro vegan™ is rich in all essential amino acids and especially high in lysine. We also added Wellbody•365™, ProHydrolase™, vegan D3 to give you additional support for recovery, immunity and stress. With our natural supersorb technology®, we ensure your body absorbs and utilizes every ingredient for better results.

**Wellbody•365™ Support for Stress: A Breakthrough Blend of Ashwagandha and Maitake Mushroom**

Patent-pending WellBody•365™ is the next-generation immune nutraceutical that provides immune modulation as well as dramatic resistance to stress for daily support. WellBody•365™ combines the power of a clinically tested, multi-patented immunomodulating maitake mushroom extract with Sensoril®, an advanced, multi-patented, adaptogenic, standardized extract of ashwagandha that is clinically proven to increase the body’s resistance to stress and lower serum cortisol levels.

Over the past seven years, in a series of human clinical trials and in vitro studies, researchers at world renowned Memorial Sloan-Kettering Research Hospital have found that the maitake extract found in Wellbody•365™ provides balanced, efficacious immune support while being highly bioavailable and safe for every day use.

In a double-blind, placebo-controlled clinical trial, subjects consuming the recommended dosage of Sensoril® ashwagandha nutraceutical extract, found in Wellbody•365™, experienced a 69.9% reduction in their level of perceived stress and a 24.2% reduction in serum cortisol levels. This extract’s adaptogenic properties, which helps bring the entire body back into balance after it has become stressed, also resulted in significant anti-aging benefits in the same trial in the areas of reduced fatigue, mental cognition, improved blood glucose levels and cardiovascular health.

**ProHydrolase™ for Recovery, Rebuilding Muscle, and Assisting in Digestion**

Ideal for anyone with an active lifestyle, this amazing enzyme represents a breakthrough in protein nutrition. ProHydrolase™ is a bio-sufficient supplement designed to build muscle mass and accelerate muscle recovery. In addition, it also helps with the breakdown of plant protein, as it can often times be difficult to digest. This greatly reduces discomfort typically caused when protein is not broken down into the smallest composition and also aids the body in absorbing more protein.

**Vitashine Vegan Vitamin D₃: To Support Healthy Immunity**

Vitashine is a 100% vegan, non-GMO and vegetarian suitable Vitamin D3 product. This exclusive vegan Vitamin D3 known as Cholecalciferol, is an oil extract that comes from a special, organic plant source called lichen, which has been used for centuries and is rich in nutrients vital to health. Vitashine is also registered with the Vegan Society and the Vegetarian Society and its research data has been validated by independent expert laboratories (including world renowned Stirling University). www.vitashine-d3.com
**What makes nanopro vegan™ different from the rest?**

- non-GMO
- natural
- Great tasting
- Highly soluble
- Sativity inducing
- Plant-based vegan protein
- Allergen-friendly
- Cholesterol free
- Contains all essential amino acids
- Environmentally friendly protein
- Slowly digested for extended energy
- Manufactured in cGMP and FDA registered facilities

**Suggested Use:** Mix one scoop of nanopro vegan™ with 6 ounces of cold water or almond milk. Shake or blend and enjoy! Children under 12 take 1/2 serving. Refrigerate after opening.

**Did you know?**

The nation’s top medical experts now agree that 75–90% of doctor visits are for stress-related ailments. Clinical trials explain how Wellbody·365™ helps reduce stress* and enhance immune support*.

In on-going human clinical trials at world-renowned Memorial Sloan-Kettering Research Hospital, researchers found that the dosage of Maitake mushroom extract used in Wellbody·365™ increased lymphocyte activity and cytokine levels for enhanced immune system function. The extract received an Investigational New Drug (IND) number in association with these trials. In a double-blind, placebo-controlled, human clinical trial involving 98 subjects, consumption of the recommended dosage of Sensoril® found in Wellbody·365™ resulted in significant reductions in stress (by 69.9%) and levels of cortisol (by 24.2%).

Because this extract also exhibits adaptogenic properties, it helps bring the entire body back into balance after it has become stressed.* This results in not only enhanced immune support but also significant anti-aging properties and greater whole body health proven in the human clinical trial. These health enhancing properties include reduced fatigue, superior mental focus, and improved blood glucose levels and cardiovascular health.

The stress-reducing, immune enhancing properties of Wellbody·365™ were evaluated at the University of Louisville by beta glucan expert Dr. Vaclav Vetvicka. Mice fed a normal diet that were subject to stress had higher levels of corticosterone (equivalent to cortisol in humans) and decreased immune function compared to non-stressed, control animals. In contrast, mice fed a diet that included Wellbody·365™ had reduced corticosterone levels and enhanced immune function in stressed and non-stressed conditions (including increased phagocytic activity and greater production of IL-6, IL-12, and IFN-gamma cytokines). These results demonstrate the breadth of Wellbody·365™’s comprehensive support of immune health. By enhancing immune defenses, reducing stress and cortisol levels, and providing anti-aging, whole body wellness, Wellbody·365™ clearly sets a new standard for multi-functional immune support for every body...every day.
