5-Hydroxytryptophan.....	50 mg
Vitamin B-6..... (pyridoxal-5-phosphate)	20 mg
NSB™ (Neural Support Blend).....	102.5 mg

SYNOPSIS AND PRODUCT USAGE!

SYNOPSIS AND REVIEW:

Prolent supports inhibitory neurotransmission in general, including GABA receptors and glycine and serotonin pathways. It also supplies vitamin B6 in phosphorylated form.

INDICATIONS: Use when Serotonin is below the reference range, or serotonin is inadequate to control elevated excitatory neurotransmitters, particularly Glutamate and Norepinephrine. (For elevated Glutamate, have patient avoid MSG.) Serotonin helps restore GABA inhibitory function. When GABA is elevated and Serotonin is low, raising Serotonin can help rebalance GABA.

CONTRA-INDICATIONS: No specific contraindications other than individuals hypersensitive to any of its ingredients.

These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure or prevent any disease.
